

New Residential Single Stream Recycling Program!!

New for 2011 is the Township residential single stream recycling program. This new single stream recycling allows residents to place all recyclable items in one single recycling bin. This allows you to reduce much of your trash by recycling. The success of our waste reduction and recycling efforts depends on all of us. South Fayette Township is doing its part to reduce waste, expenses, and to help our environment. The Township spends almost a million dollars each year to haul away garbage. By recycling more we can increase grant revenues and reduce our garbage expenses – which helps all township taxpayers. It is Township law that all households, schools and business recycle. Please read below for all allowable items to be recycled.
